

Making money online is easy!

A guide to making \$400,000 or more a year online

Angela V. Edwards

This is where I am obliged to tell you the obvious. I, nor anyone else can guarantee what you might do or make using this or any other strategy. Hard work in and of itself is no guarantee of success. I wish you all of the financial success with this strategy but your mileage may vary.

This is a Free Ebook. You may give it away to anyone you want, as long as you don't change anything.

Contrary to popular opinion, making money online is easy. Anyone can do it. In fact, anyone can make a LOT of money online. All it takes is just a tiny little bit of knowledge about some simple principles of online selling.

I get quite a few questions from folks asking me for "hints" or "secrets" to SEO and getting to the top of Google. While I don't have any 'secrets' per se, I do have a small bundle of information that *anyone* can use to make a bunch of money online.

I get quite a few questions from folks asking me for "hints" or "secrets" to SEO and getting to the top of Google. While I don't have any 'secrets' per se, I do have a small bundle of information that anyone can use to make money online.

Here is my "moneymaking knowledge", in a nutshell:

1. People will spend money to relieve pain, even during a recession.

When people are suffering, they will spend money if it means that suffering will be relieved. In these lean times, people are tightening the belt and pinching pennies all over the place. Families are not taking their annual vacations, smokers are giving up costly cigarettes, and more people are eating at McDonald's than at Red Lobster. However, when it comes to

relieving something that causes pain, people are willing to give up pretty much any amount of money to get that pain to go away.

2. You can get a GoArticles article to Page One of Google quickly and easily.

Obviously, if the keyword you are competing for has 186 **million** results, you won't get an article to Page One in a week. But I have seen a brand new, not-yet-indexed GoArticle get to Page One of Google *overnight* with a Long Tail (low competition) Keyword after I did backlinks to it. This article directory is **the most responsive** article directory to backlinks; much more so than Ezinearticles.com, believe it or not. With my monthly packet of backlinks, you can get articles posted on the GoArticles directory to Page One of Google very quickly. **I've had articles go from being brand new, not-yet-indexed to Page One of Google in less than 8 hours.**

3.GoArticles allows affiliate links in their articles and doesn't require a week's wait before your article goes "live".

These are actually some of the nicest things about the GoArticle article directory. Your article goes in pretty much right away and you don't have to have your own website to make money; you are allowed to use affiliate links on GoArticles if you want to. Or you could use a Hubpage or Squidoo Lens or something that doesn't cost you.

My brother Michael and his grown daughter Aliese have both requested recently that I show them how to make an income online. I am going to show you exactly what I showed them.

First, I would go to [Clickbank](#) and pick a product that relieves some sort of pain for people. Something that dealing with causes people serious trouble and heartache in their lives. Something that people would be willing to put money into in order to be free of.

I'd pick something like **Panic Attacks**. People who suffer from panic attacks often are hospitalized many times before they realize what it is (they usually think they are having a heart attack), and often these people cannot earn a living or leave their homes. Many of them become prisoners in their own homes.

Then, I'd plug the broad keyword **Panic** into the **Wordtracker Free Keyword Tool**:

[Panic in Wordtracker](#)

Then, I would look at my results in Wordtracker, and plug several of the keyword phrases shown into the Google Search Engine until I found a keyword phrase that has less than 500,000 results in Google without quotes. (This is important because most searchers won't use quotes when they are looking for information in Google.) With an article on GoArticles and my backlink packets, I can easily get to Page One of Google quickly. The keyword phrase I picked for this example is:

panic heart attack symptoms.

According to Wordtracker, **271 times a day** people plug this keyword phrase into Google. 271 times a day! That's **8,130 times per month** people are searching for these exact keywords. However, when you put this keyword phrase into Google, you find out that it only has 316,000 competing sites without quotes. I can *easily* rank number one for these keywords with one little article on GoArticles and my backlink packets.

Clickbank offers the following product to relieve panic attacks in the sufferers:

[Clickbank's Panic Product](#)

Clickbank pays \$43.10 per sale of this particular product. \$43! Now let's say I decide to put this product into my article's bio box. Okay, so I put my affiliate link for this product into my bio box and then I do my backlinks to it, putting it on Page One of Google within a week.

Here are the click-through rates of items that are located on Google's Front Page:

Google Click through Rate Stats

- # 1 SPOT in Google gets 42.3 % of all clickthroughs
- # 2 SPOT in Google gets 11.92 % of all clickthroughs
- # 3 SPOT in Google gets 8.44 % of all clickthroughs
- # 4 SPOT in Google gets 6.03 % of all clickthroughs
- # 5 SPOT in Google gets 4.86 % of all clickthroughs
- # 6 SPOT in Google gets 3.99 % of all clickthroughs

What if my article was Number One in Google (very easy to do with my backlinks) and only 1/10 of the people searching for the term panic heart attack symptoms every month went to my article's bio box and bought the product? 1/10 of 8,130 is 813. So I make 813 sales of this product every month at \$43.10 a pop:

813 sales X \$43.10 = \$35,040.30 PER MONTH in sales.

In a year, this product could bring me **\$420,483.60!** One product and one article! Imagine what could happen if I used the same technique for 10 or even 20 of these articles for different "pain relieving" products?

In order to get your GoArticles article to Page One of Google, you have to do a backlink campaign to it. That's why my backlink packets are so valuable. They can put your GoArticles article firmly on Page One of Google (and possibly even the number ONE spot) very quickly. Remember, I've seen articles on this directory get to Page One of Google in less than 8 hours after I did backlinks to it.

If you're selling watches or shoes or purses or something but haven't been terribly successful due to the economy, what have you got to lose by putting up a couple of lucrative articles that can help line your pocket while you're getting your other online business off the ground? Don't forget that you can still have my first packet of backlinks completely free through my other Warrior Special Offer, located here:

[My Backlinks Warrior Special Offer](#)

Often, one packet of backlinks is all it takes to get a GoArticle article to Page One of Google. Remember, I've seen a brand new GoArticles article get to Page One of Google overnight. With these packets coming to you every month, you have everything you need to make a very good living on the Internet.

With GoArticles, Clickbank, and my monthly backlink packets, anyone can make a full time living online. Anyone. Don't make it more difficult than it has to be. Start making money today.
